MESSAGE

Dear Colleagues,

We are thrilled to announce the upcoming 3rd Continuous Professional Development (CPD) conference on advanced joint Imaging and Interventions, along with the Cadaveric Hands-On Ultrasound workshop, on 16th & 17th November, 2024 at Kamineni Academy of Medical Sciences & Research Centre, LB Nagar, Hyderabad. IRIA TS Chapter Organized its second MSK Interventions and academic Hands on training CPD at Mamatha Academy of Medical Sciences, Bachupally, Hyderabad in June 2023. This conference is set to be a landmark event featuring a distinguished panel of national and international experts.

Indian Radiological and Imaging Association, Telangana state chapter is always in the forefront and knows importance of staying up-to-date with the latest trends and technologies in our field. This conference is an incredible opportunity to do just that, providing you with the latest insights into advances in joint imaging and interventional procedures.

MSK interventions are growing in popularity due to their minimally invasive nature, and include various joint injections and treatment of tendon, ligament, and muscle injuries. This will expand the field of ultrasound to our members in diagnostic and interventional management of musculoskeletal disorders and sports injuries.

At this conference, you will have the chance to learn from experts in their respective fields, including keynote addresses and interactive sessions. You will also have access to the latest innovations in imaging technology and interventions, as well as hands-on training with cadavers.

I urge all of you to attend this conference, as it promises to be a remarkable event that will enhance your knowledge and skill set in the field of MSK ultrasound and interventions. This is also an excellent opportunity to network with colleagues from around the country and to exchange ideas, experiences, and best practices.

We look forward to seeing you at the Advanced joint Imaging and Intervention Hands-On cadaveric workshop in Hyderabad.
